SKILLS

Languages: Java, SQL, Python, JavaScript, HTML, C.

Tools/Framework: React, Springboot, Numpy, Pandas,

PROJECTS

Technology — **Web-based weather app development**

- Use HTML, CSS, and JavaScript for user-friendly input, real-time weather data from an API, and responsive design.
- Consider adding user accounts, geolocation, and backend integration for advanced functionalities in this frontend-focused project.

Technology — **CRUD Application - Student Management**

- Combine HTML for structure, CSS for styling, and JavaScript for dynamic functionality.
- Implement Create, Read, Update, and Delete operations for student data.
- Design an interactive user interface with responsive styling for an intuitive student management system.

Technology — **Web-based Portfolio app development**

- Utilize HTML for structuring the portfolio and CSS for styling, ensuring a visually appealing and well-organized layout.
- Implement Create, Read, Update, and Delete operations for student data.
- Implement JavaScript to add dynamic features, such as interactive project galleries or form validation, enhancing the overall user experience of the portfolio web application.
